

# ImageDepot

powered by:

ImageDepot is a next-generation on-demand Web-based document review tool. With ImageDepot, your law firm or corporate legal department can leverage the latest review and case management technologies without the added cost of hardware, software or technical support personnel. Once the data is loaded, lawyers, paralegals and support staff can begin sorting, filtering and reviewing documents in a secure collaborative virtual review environment.

## ***BENEFITS OF IMAGEDEPOT:***

- ★ Powerful searching, sorting, annotating, tagging and grouping of both native files and images.  
Create as many custom tags as needed.
- ★ Easy, secure (SSL encryption), and simultaneous collaboration for all parties without the cost of making multiple copies or creating multiple databases.
- ★ Access your case documents at home or on the road from any Internet connection.
- ★ One click production of privileged file reports and other file and review logs.
- ★ The freedom to print copies of case documents whenever wherever -- including batch printing.
- ★ A complete audit log of all user and file activities.
- ★ Hosted in a secure Tier 1 facility managed by Level 3.
- ★ A company-wide commitment to customer service and support

Additional offerings often requested in conjunction with online hosting include:

- ★ Data Collection
- ★ Database Maintenance
- ★ EDD Processing
- ★ Computer Forensics
- ★ Coding / Indexing
- ★ Scanning
- ★ Data Minimization
- ★ OCR
